**FEEDING GUIDELINES**

Depending on the age, activity level and condition of your cat, the feeding guidelines will need to be adjusted. The normal daily feeding amount for a healthy adult cat:

Cat's Weight	Amt to Feed Per Day
5 - 10 lbs	1/4 - 3/8 lbs
11 - 15 lbs	3/8 - 1/2 lbs

For pregnant or lactating females, offer two to three times the normal adult requirement from two to fourteen months of age in three to four feedings. When switching foods, gradually increase the new food and decrease the previous food to help make a smooth transition.
